Madison, Wisconsin

*The Catalog of United States Perfins* identifies the confirmed user of perfin pattern B160 - BM/C - as Berger Manufacturing Company of New York City. The supplemental data appendix shows additional users Berley-Berger Manufacturing Company, Stark Roller Mill Company and a precancel from Canton, Ohio. The photographically cropped illustration confirms the fact that The Berger Manufacturing Company also had offices in Canton, Ohio. The September 29, 1937 mailing's corner card lists the Canton location as the company's Steel Building Products Division.

The cover also is an indication that one of the supplementary company names is spelled incorrectly. The logo incorporated into the corner card lists B/Berloy/Blue/Label/Line. "Berley" probably should be corrected to read "Berloy."

A full-size photocopy has been sent to the US Catalog Editor for evaluation.
